

# N-MC-RE

## MCP Accessory - Intelligent Manual Call Point Resettable Element

### General

---

The N-MC-RE is a flexible trigger element for compatible Type-A manual call points. It allows the manual call point to be reset after activation without the need to replace the element.

### Visual indication

---

The N-MC-RE uses clear black print on a brilliant white background. An arrow on either side pointing inwards towards a dot indicates to the operator where to push on the element to activate the manual call point.

### Easy to install

---

Installation of the flexible element in a compatible manual call point is made easy by the product design. Using the test key the front cover of the manual call point is removed, allowing the insertion of the N-MC-RE with a quick and simple action.

### Details

---

- Quick installation without special tools
- No replacement required after activation
- Regular test procedures encouraged without the added cost of replacements
- EN54 certified with compatible manual call points
