

## Datasheet

### ELECTRIC STRIKES/ PR Series - Compact Euro Strikes

#### Product description

The PR range of strikes is new to CDVI. Featuring the latest technology to enable a super compact strike, our smallest yet, but still able to deliver 330kg holding force at the jaw and up to 400,00 operations.

Exclusive to this range of strikes, the PR series features a radial jaw and a special cover plate, allowing the strike to be cut into the frame without a side profile for a perfect installation.

The MOV (metal oxide varistor) fitted inside all PR strikes protects your system from electric spikes that can cause damage to electronic control devices.

#### Key features

- Super compact Euro strike
- Special cover plate
- Radial jaw and adjustable jaw
- Non-handed
- Fail safe and fail secure
- Built-in MOV

 *Certification*

 *DEEE*

 *Certification*

 *-15°C to 40°C*

## Product Specifications

**Material:** Stainless steel  
**Installation:** Mortice installation  
**Preload operation:** 25kg  
**Holding force:** 330kg  
**Cycles:** tested to 400,000 operations

## Electrical Specifications

**Power input:** 10V to 24Vac/dc  
**Consumption:** @10V = 230mA,  
@12V = 280mA, @24V = 560mA
