

## Installation adapter for suspended ceilings

### Part-No.: 805577

The mounting adapter is used for the quick and secure attachment of bases of the IQ8Quad detector series, 9x00, IQ8Alarm Plus and alarm signaling devices, parallel detector indicators, etc. to suspended ceiling systems. It saves the usage of special hollow cavity fasteners, since the mounting screws of the bases are screwed directly into the slots of the mounting adapter. The mounting adapter offers additional advantages in the fixing of the cables, rigid/flexible cable inlays and threaded cable connections.

### Common technical data

Material	ABS
Color	white, similar to RAL 9001

 1 cable tie per mounting adapter included
