ACCESSORIES/ FLEX-30/FLEX-60 - Compact Door Loop

Product description

The range of door loops from CDVI offer a safe and secure method of transferring cables from a fixed point, such as door frame onto the door leaf.

All models have a metal loop for better protection, and all have a minimum internal diameter of 7mm which is sufficient to handle the most common cables used in door locking/control.

The new "Flex" door loops have been introduced as extremely competitive units - newly designed cast aluminium ends with concealed fixings are features you would normally find on higher priced units.

Key features

- 30cm (FLEX-30) and 60cm (FLEX-60) door loops
- Cable/power management
- Easy to install
- 7mm internal diameter
- Economical and vandal resistant
