

SensoIRIS MOUT-240

Relay Output Module 240VAC

- Built-in isolator module
- IP21 Protection

SensoIRIS MOUT-240 is a relay output control module designed for application in addressable fire alarm systems, supporting TTE communication protocol. The module provides interface for 240V and it is suitable for control of 240VAC voltage circuits. The module is designed with a built-in module isolator and is certified according to the requirements of EN 54-17. SensoIRIS MOUT-240 is powered on from the fire panel and can be controlled via the communication protocol. The module is mounted in a separate small plastic box suitable for wall mounting, with transparent cover for visual inspection. SensoIRIS MOUT-240 is certified according to the requirements of EN 54-18.

Features

- Built-in isolator module
- ABS Plastic material
- IP21 Protection

Technical Specifications

Operating Voltage Range	16- 32VDC
Nominal consumption during communication	220 μ A
Current consumption in stand-by mode	175 μ A@27VDC
Current consumption with LED on	4mA
Relay ratings	4A/ 250VAC; 3A/ 30VDC
Max cross-section of the cable	2.5mm ²
Operating temperature	-35°C to +60°C
Relative humidity resistance	(93 \pm 3)% @ 40°C
Weight	~230g
