

I. Introduction

PR-24AC-12DC is designed for long distance power transmission over DC cable. By using higher voltage power source , PR-24AC-12DC will convert it back to 12VDC at camera side to realize long distance power transmission especially when more power consumption is required such as large IR cameras.

II. Features

1. Input: 20~30V AC
2. Output: 12V DC, 1.0 Amp
3. transmission distance up to 500 (using PR-24V1A-AC power supply)
4. Easy installation connector terminals
5. Working temperature:-30 to 80°C
6. Dimensions:75*30*23mm

III. Connection Diagram
