PROXIMIY READERS/ SELW-2630MF - External Receiver

Product description

The SELW-2630MF is an access control receiver with 26 or 30-bit wiegand output. It is suitable for external use and ideal for gates and barriers.

The SELW-2630MF is compatible with all CDVI TX26 series transmitters.

It has a high performance read range and is easy to mount. It can be used as an optional tuned antenna with this receiver for better reception.

Key features

- Optional tuned antenna
- Wiegand receiver for outdoor use
- Up to 100m range in open field
- Ideal for gates and barriers
- Compatible with all CDVI rolling code transmitters

 *Certification*

Product Information

Material: polycarbonate housing

Wiegand: 26 or 30 bits

Frequency: 433.92 MHz

Encoding: Keeloq rolling code
AM/ ASK

Electrical Specifications

Operating voltage: 12/24Vac/dc

Max current: 24mA
